

Living with and Beyond Cancer One Day Masterclass for General Practice Nurses

6th Feb 2019

10:00 – 16:00 at Evolve Durham

The incidence of cancer is increasing as the population ages and consequently more common forms of cancer are being treated successfully. More people than ever will go on to experience and survive cancer in future. This increase in survival rates will certainly be a challenge to the NHS and the current services provided in General Practice.

This one day masterclass is aimed at Nurses who work in general practice and will care for patients with cancer. The masterclass will explore some of the challenges that survivors face and also the challenges in General Practice when considering cancer as a long term condition.

By the end of the masterclass you should be able to;

- Explore the notion of survivorship
- Understand the lived experience of cancer from the patient perspective
- Discuss the ways to support cancer survivors.
- Reflect on current practice and the challenges we face
- Discuss how practitioner may approach the challenges through new and different ways of working and improve outcomes
